🪪 Profile

⭐ 100% Refund Guaranteed ⭐ 🏆 Top Rated Plus (Full Stack, MERN Stack, Python, ETL, Elasticsearch) 🏆 ✅ Experienced **Full Stack Developer** with a proven track record in the software industry, providing standardized and optimized solutions. 5+ years of Software development experience Developed many enterprise-level applications using the following technologies: - **Frontend**: JavaScript, TypeScript, ReactJS, NextJS, JQuery, Ajax, HTML5/CSS3, SASS, Media Queries, MaterialUI and all other UI libraries. - **Backend**: NodeJS, NestJS, ExpressJS, Python, FastAPI, Django, Celery, Flask, RabbitMQ, Kafka, LogStash, ElasticSearch, and ETL - **Deployment**: AWS (ECS, EC2, S3, SES, SMS, SQS, ECR and Load Balancing) GCP, GitHub, GitHub Actions, BitBucket, Jenkins ▶ **WHAT I'M OFFERING**: If your business is in need of a highly efficient, responsive, technically strong, and well-experienced FULL STACK software developer to maintain a long-term working relationship and attend to all your development needs, I am that person. I take great pride in my strong debugging, re-factoring, and problem-solving skills with a passion for solving complex business problems and delivering the best and optimized solution for my clients. ▶ **WORK EXPERIENCE**: I'm a well-accomplished Senior Software Engineer with over half a decade of enterprise application development experience, with proven results in leading high-profile projects ▶ **PROFICIENT** software architecture/design/development concepts and technologies: Additionally, I am an expert on: - Software development processes/tools such as Agile-scrum ║ Kanban ║ JIRA║ Trello - To deliver stable/quality output, I have practiced concepts such as Test-driven designs (TDD) and have hands-on experience in using unit testing frameworks such as UnitTest, Pytest, Selenium, Jest, Cypress, and React Testing library - Furthermore, I have hands-on experience in web scraping using Python, utilizing frameworks and below, ⭐ Blockchain Service: Custom Blockchain | Smart Contracts | Decentralized Applications | Blockchain Marketing | Trading Exchange ⭐ Blockchain Solutions: Healthcare | Insurance | Real Estate | Diamond & Gold | Banking & Finance | Supply Chain & Logistics ⭐ WEB3 | Ethereum | Solidity | ERC20 | ERC721 | DEX | CEX | Yield Farms ⭐ Digital Currency Solutions: Crypto Currency Solutions | Initial Coin Offering (ICO) | Cryptocurrency Software | Crypto Wallet | Cryptocurrency Token Development ⭐ DEFI: DeFi DAPP | DeFi Wallet | DeFi Exchange | DeFi Insurance | Lending Platform | DeFi Marketing | DeFi Smart Contract | DeFi Token | DeFi Yield Farming | Staking Platform **Let's build something great together**!

🎓 Education

Bachelor Of Software engineering   03/2018 – 03/2019
ALX ⌆   Addis Ababa, Ethiopia
website: alxafrica.com ⌆
During my time in the ALX Software Engineering program, I developed my skills by building a
Simple Shell from scratch in C, a challenging project that involved creating terminal
functionalities like getline and buffer management. This experience deepened my understanding
of low-level operations, including reading and writing data, and managing command histories
with doubly linked lists. Additionally, I expanded my expertise by working on projects like a web
server with Nginx and a cloned master database system using MySQL. My journey through ALX
culminated in a robust foundation in both front-end and back-end web development.

🧠 Skills

Blockchain — Smart Contracts , NFT, Dapp, Yield Farming, solana, web3, meta mask solidity Defi
DAOs Polygon Layer 2 Diamond Standard (EIP-2535), EIP-4844, ERC-20, ERC-721, and ERC-1155
Uniswap, Lens, Lido, and Safe • **UI UX** — figma, cascading, graphics design, photo editing •
React js — html5 css3 deployment redux Performance Optimization Routing React Hooks UX
designing Event Handling • **Next ts** — Server-Side Rendering (SSR) │ Static Site Generation (SSG)
│ API Routes │ Data Fetching │ Image Optimization │ Authentication and Authorization │
Middleware and API Middleware │ Dynamic Imports and Code Splitting │ Deployment and
Production Optimization │ File-Based Routing • **Django** — Docker │ Class-Based Views │ ORM
Optimization │ Middleware │ Caching Strategies │ Security Enhancements │ Custom Template
Tags and Filters │ Asynchronous Views and Tasks • **Node js** — Performance Optimization │
Advanced Routing Techniques │ Error Handling and Logging │ Integration of External Services
and APIs │ Testing and Debugging Techniques • **React Native** — expo │ firebase

💼 Professional Experience

Full Stack Developer React|Node|Solidity   03/2024 – present
Steelo ⌆   london, uinted kingdom
website : steelo.io
As the Head of Blockchain at Steelo, I led the development and implementation of our blockchain
infrastructure. I spearheaded the integration of Polygon 2.0's ZkEVM for efficient, low-cost
transactions and utilized Solidity for smart contract functionality. My role encompassed designing
the dual-token system for governance and creator engagement, enhancing scalability with EIP-
2535 Diamond Standard, and ensuring secure, community-driven governance through Steelo
Improvement Proposals. This strategic direction supported our mission to revolutionize the creator
economy by providing a decentralized, transparent, and sustainable platform.

Full Stack React Django Developer   2021 – 2022 | toronto, canada
hanout boutique ⌆
website : hanoutboutique.com ⌆
• Developed and maintained the e-commerce platform for Hanout Boutique using React for the
  frontend and Django as the backend framework.
• Implemented features like a dynamic product catalog, a secure shopping cart, and user
  authentication to enhance the online shopping experience.
• Optimized the website for performance and scalability, ensuring a smooth and responsive
  interface that supports high traffic volumes.

Backend Developer
Dogue ⧉
portugal

website: dogue.com.au ⧉

- Developed and maintained DOGUE's online store, implementing a feature-rich shopping experience tailored for canine products and accessories.
- Integrated advanced functionalities like a product recommendation engine, customer loyalty program, and real-time inventory management using modern web technologies.
- Focused on creating a mobile-friendly, user-centric interface that supports high traffic volumes and delivers a seamless shopping experience for pet owners.

Node JS Back End Developer
big blanket ⧉
2022 – 2023 | missouri, north america

website: bigblanket.com ⧉

- Engineered the backend services for Big Blanket Co's online store using Node.js, ensuring robust handling of user interactions like order tracking, returns, and cancellations.
- Integrated multiple payment gateways and developed APIs for real-time inventory and customer service functionalities.
- Focused on scalability and security to support the high demand and ensure a seamless customer experience.

Full Stack MERN Developer
condado tacos ⧉
2022 – 2022 | italy

website: condadotacos.com ⧉

- Developed the customer rewards and ordering system for Condado Tacos, enhancing user engagement and loyalty through a seamless digital experience.
- Integrated a feature-rich mobile app with functionalities for real-time order tracking, rewards accumulation, and exclusive offers, focusing on user-friendly design and secure transactions.
- Implemented analytics to monitor user behaviors and preferences, driving targeted promotions and improving customer satisfaction.

Django Developer Backend
kafu games ⧉
2022 – 2023 | brazil

website: kafugames.com ⧉

- Led the development of a comprehensive esports platform for KAFU Games, facilitating global access to tournaments and crypto rewards.
- Implemented features like tournament registration, NFT airdrops, and real-time competition updates using Node.js for backend operations and seamless wallet integrations.
- Enhanced user engagement through a mobile-responsive design and intuitive navigation, significantly boosting participation in esports events.

Next JS Front End Developer
vanly ⧉
2020 – 2021 | france

website: vanly.app ⧉

- Engineered features for the Vanly Photographer Network to connect photographers with safe overnight parking options across the US.
- Enhanced the platform with capabilities like geolocation search, booking integration, and an interactive map showcasing amenities.
- Developed a responsive interface and ensured secure payment transactions, improving user engagement and operational efficiency.

UI / UX designer
Steelo ⧉
2024 – present | united kingdom

website : https://www.figma.com/proto/2yj8VNO4VYM7YWkWRYJT2m/Steelo-v0.5?page-id=0%3A1&node-id=237-8244&viewport=-1368%2C69%2C0.32&t=pHOceh8I1PF4iNbu-1&scaling=scale-down&content-scaling=fixed&starting-point-node-id=237%3A8244&show-proto-sidebar=1 ⧉

i was responsible for the design and development of ht ebeatifully architecutred UI

NFT ERC721 solidity Smart Contract Developer
MBD GEMZ ☐

website: nft-marketplace-aggrigator-git-main-weiblocks.vercel.app ☐

- Spearheaded the development of MBD Gemz, an AI-powered NFT marketplace, focusing on secure smart contract solutions for minting, selling, and trading NFTs across diverse categories.
- Implemented features such as real-time AI analytics for market trends, automated rewards systems, and enhanced user interaction with the ability to connect digital wallets for seamless transactions.
- Integrated advanced blockchain functionalities to ensure a robust, scalable platform capable of supporting high-volume trading and minting activities, enhancing the user experience in the evolving NFT space.

Smart Contract Developer   2022 – 2023 | united kingdom
Ups Vs Down ☐

website: upvsdown.com ☐

- Developed and integrated smart contracts for the UPS vs DOWN NFT platform, enabling the minting, trading, and breeding of unique digital assets on the blockchain.
- Created functionalities for NFT incubation and feeding processes, ensuring a dynamic and interactive user experience.
- Implemented security protocols for NFT transactions, including wallet connectivity and transfer verification to enhance user trust and platform reliability.

Full Stack Blockchain developer   2023 – 2023 | united states
ALRU real estate ☐

website: akru.co ☐

- Engineered and deployed smart contracts on the blockchain to facilitate tokenization of real estate assets, enhancing security and transparency for AKRU's investment platform.
- Developed features for fractional ownership, enabling investors to purchase premium commercial properties with as little as $1000.
- Integrated blockchain technology with traditional real estate investment processes, providing a seamless, efficient, and accessible platform for both institutional and individual investors.

Next JS Developer With Tailwind CSS   01/2023 – 02/2024
upwork Nikolas Legetic   san francisco, united states of america

website: upwork.com ☐

I seamlessly bridged frontend and backend, harnessing Next.js for dynamic UI and Prismic slices for efficient content management. Empowering projects with AI-centric features, I ensured a cohesive blend of frontend innovation and backend functionality for optimal user experiences
